Programme overview

Never before has coaching been so important globally as a critical tool to navigate and thrive in our increasingly VUCA (volatility, uncertainty, complexity and ambiguity) environment. Coaching evokes self-responsibility, accountability, self-reflection, creativity and innovation. It provides clarity of thinking and independent action, confidence, as well as supporting well-being and a deepened level of trust and connection between leaders and those in their sphere. It creates sustainable behavioural change at both an individual and cultural level in organisations.

Our Executive Coach Certification Programme (ECCP) has been approved by the International Coach Federation (ICF) since 2010 and satisfies the coach training requirement of their first level of their international credentialing (ACC).

The programme develops coaching capability in anyone who is a leader of people, is an important pillar in creating coaching cultures in organisations, and also fully equips those seeking to become an external Executive Coach – now or in the future. We provide highly experiential and practical training that can be implemented immediately. Beyond a skill-set, it importantly shifts mind-sets of participants to connect and communicate differently, to recognise, respect and elicit the potential of those they encounter, and facilitate outstanding outcomes as a result.

Our ECCP typically attracts successful professionals whose focus is the application of coaching in a corporate context. Our quality participants add a valuable layer of richness and diversity to the learning and experience of the programme, as well as beneficial networking opportunities.

We offer a suite of unique and proven coaching models which have been delivered and embraced across more than 14 countries. Our models were designed by Lisa Wandl based on her approx 20 years of immersion in the coaching industry, and provide strong and clear structures to new coaches and add valuable dimensions to the toolkit of experienced coaches. The frameworks, processes, tools and skills provided enable participants to confidently apply their skills in coachable moments.

The programme is offered either as a fully virtual programme or as a combination of face to face and virtual training. In both offerings, the programme has substantial live blocks of training (either face to face or Zoom) at the beginning and end of the programme, which spans approximately 3-4 months. Between the live elements, the deepening and embedding of the programme learning, is supported through group calls, podcasts and experiential and practical partner work. Following the core training, further optional group mentoring calls are provided to support ongoing development and guidance.

Since 2009, we have developed an alumni of more than 1000 individuals, spanning 3 continents, and providing an impressive professional community. Our partnership with Mindspan Development has supported Coaching Australia to deliver the ECCP in China as a market leader for more than a decade.

"I was sitting in Lisa's coaching class (ECCP) for 6 days to be a certified coach and couldn't stop thinking that I had made the right choice. I'm sure Lisa is a great coach as she demonstrated during class, but more than that I believe she is a great educator to make people start to love coaching as a career.
